

Seagate Ships "Fastest" 6TB HDD

Written by Marco Attard
11 April 2014

Seagate starts shipping what it claims is the fastest 6TB enterprise HDD yet-- the Enterprise Capacity 3.5 HDD v4 equipped with next generation 12Gb/s SAS for a performance boost of up to 25% over similar capacity drives.

Designed for use in both replicated and RAID environments, the drive feature rotational vibration tolerance and enhanced error correction, as well as built-in security with Instant Secure Erase self-encryption and FIPS SED options.

Performance clocks at 7200RPM, while T10- and T13-compliant power management promises optimal energy usage with up to 90% more power savings.

The HDD v4 is available now in 12Gb/S SAS and 6Gb/s SATA versions.
