NCS launches the Bunker XRV-5241-- a rugged 1U short-depth server fitting in tight spaces designed for military and industrial deployments such as civilian first responders and outdoor construction.

It meets all military performance specifications, including MIL-STD-810G, MIL-S-901D and MIL-STD-167 environmental, shorck and vibration requirements.

Inside are dual Intel Xeon E5-2600 series processors, up to 256GB of DDR3-1600MHz RAM (in up to x8 DIMM slots), x4 2.5-inch hot-swappable HDDs, dual ethernet ports and multiple PCI-E 3.0 expansion capabilities.

An enhanced KVM over LAN feature allows remote appliance management, while NCS offers both a DC power option and low voltage kits.
