Legrand Completes Acquisition of Raritan

Written by Bob Snyder
30 January 2016

Raritan recently introduced a new IP User Station for the **Dominion KX III digital KVM switch**, Raritan's flagship enterprise-class KVM-over IP switch that provides 1, 2, 4 or 8 users with BIOS-level remote management of 8, 16, 32 or 64 servers in a single switch. The Dominion KX III is suitable for server rooms, test labs, and the largest enterprise data centers.

For broadcast, control rooms, labs and studios, the new KX III User Station provides high-performance, KVM-over-IP access in a self-contained, low-maintenance appliance. Its supports two 1080p video sessions at 30 FPS, simultaneous access to eight or more servers, dual monitors, audio and virtual media.

But the flagship launch was overshadowed by corporate news: **Legrand North America announced its acquisition of Raritan is now complete**
. Doug Fikse has been appointed President of Raritan and will report to John Selldorff, President and CEO of Legrand North America.

Raritan will operate as an independent business within Legrand North America. Raritan's intelligent rack power distribution units (PDUs), sensors, and KVM switch products provide data centers of any size the control needed to increase power management efficiency, improve productivity and enhance operations.
