Attero Tech's **Dante unDNEMO** is an audio monitoring solution providing end users with **a simple solution for selection and monitoring of up to 64 Dante audio channels.**

It comes with easy–to-read OLED display for presentation of channel names, volume settings and configuration.

It's PoE powered to work with any compliant 802.3af PoE network switch or mid-span injector, external +24VDC supply.

Dante Daisy Chaining allows multiple unDNEMO, as well as other Attero Tech daisy chain enabled devices, to be connected over a single home-run to the Ethernet switch.
