

Comprehensive Intros Pro AV/IT HD18 Cables

Written by Marco Attard
20 April 2017

Comprehensive Connectivity Company launches the Pro AV/IT HD18G series of 4K60 4:4:4 HDMI over fibre plenum cables designed for system integration and other commercial applications.

The cables offer a low smoke and fire-retardant plenum jacket, as well as UHD, 18G 4K 60 4:4:4 end to end performance, with high-speed, plug-and-play HDMI signal transmission in lengths of up to 33m. Active components in the connectors perform electrical-to-optical conversion, drawing power from the HDMI port.

Each cable is thin, light, flexible and plenum rated, making it easy to pull through conduit. Comprehensive plastic optical fibres accommodate tight bends with no signal loss (unlike glass optical fibres), while the use of light pulses provides higher immunity to EMI/RFI interference and magnetic noise.

HDR, EDID, CEC, HDCP and RoHS compliance is included.
