Gateway Updates Server Family

Written by Marco Attard

18 March 2011

Gateway releases its latest AMD Opteron 6000 series-based offerings, carrying AMD Opteron 6100 processors and available in 8- and 12- core versions.

Designed with SMBs, enterprises and public sector environments in mind, the Gateway SMB server line comes in tower, rack and multi-node series.

The Tower series GT115 F1 is a single socket tower server for the space conscious users; the GR585 F1 is a quad-socket 2U rack server with up to 12-core processing power, DDR3 technology and comprehensive maangement features; and the GW2000h w/ GW175h/q F1 carries up to x4 hot-pluggable nodes in 2U form factor to maximise computing power and thermal control.
