

Platinum Tools Launches ezEX38 RJ45 Connector

Written by Frederick Douglas
20 March 2019

The ezEX38 from Platinum Tools is an RJ45 connector designed for smaller insulation diameters typically found in Cat5e and smaller Cat6 cabling, with a simple one piece/pass through design with no bars or liners.

It features the same unique patented Hi-Lo stagger load bar, allowing conductors to pass through the front end of the connector to easily verify the wiring sequence before termination. The insulation diameter of the conductor is 0.84-0.97mm, while the maximum outer diameter is 7.36mm.

The connector features 50 micron gold-plated contacts, and is compatible with Cat 5e, 6 and 6A cabling. It is TIA, TAA, RoHS, UL and FCC compliant, with solid or strand 24-22AWG. The compatible crimping tool is the Platinum Tools EXO Crimp Frame and EXO-EX Die (100061C).

The ezEX38 is available now.
