Key Digital launches the KD-2x1CSK (a 2x1 switcher) and the KD-4x1CSK (4x1 switcher)-- both capable of switching 4K HDMI signals with HDCP 2.2.

The two switchers support all SD, HD, VESA and 4K video standards, including 4096 x 2160, 1080p60, 1920x1200 and 3D, and both offer control through either front panel push buttons or optical IR switching. Also included are EDID control and a built-in internal library of 15 EDID handshakes, in addition to EDID data of output/display one.

A full buffer systems manages TMDS re-clocking/signal re-generation, HDCP source and display authentication, Hot Plug Management and EDID control handshakes.

On the audio side, the switchers support lossless compressed digital audio formats, including Dolby TrueHD, Dolby Digital Plus, DTS-HD Master Audio and Dolby Atmos.
