---

Wire and cable preparation, installation, hand termination and testing specialist Platinum Tools announces the Xpress Jack Termination Kit-- a kit designed to make keystone jack terminations "easier than ever."

The package consists of a cat5/6 cable jacket stripper and scissor-run electrician's scissors. The jacket stripper and scissors allow installers to prepare the cable, while the Xpress jack punchdown tool makes terminating keystone jacks an easier and more expedient process.

The kit also includes a hanging tool pouch, ten blue keystone cat6 110 jacks and ten white cat6 110 jacks.
