---

Intellinet Network Solutions introduces a new line of IP network cameras with outdoor enclosures, replaceable lenses and video servers.

The Intellinet Network Solutions cameras provide an image resolution up to 640 x 480 pixels, 3GPP mobile phone streaming and 16-channel Windows-based recording software. With MPEG4 and Motion-JPEG Dual Mode, they feature event-triggered FTP and e-mail upload of still images and video.

The NFC30 Network Cameras are indoor cameras available in wired, wireless and wireless night-vision models and come in the new Intellinet Network Solutions custom housing.

The NBC30 is an outdoor night-vision model. The NFD30 is an indoor dome camera. The NVS30 Network Video Server supports CCTV cameras.
