---

Multipix release its new **3G HDSDI camera**, SDI-900.

Along with its 3G HDSDI interface and video resolution up to 1080p 60P, its new fiber data link built- in assures there is no latency for video transmission.

The maker says its designed for for HD video conferencing, HD live broadcasting, HD distance learning, and further HD video applications. The 18x optical zoom AF (160x) lens shows all the details.
