

MSI Debuts New All-in-One PCs at CeBIT

Written by Marco Attard
08 March 2012

MSI launches a range of consumer and professional all-in-one PC models at CeBIT 2012--specifically the Wind Top AP16 and AP2011 business models.

The AP16 is a 16" model with x2 built-in COM ports (making it ideal for cash registers or barcode readers), while the AP2011 is 20" in size. The AP16 supports fast boot from USB stick (allowing users to quickly switch between operating systems) while the AP 2011 features an adjustable stand and carries a second-generation Intel Core processor.

Both carry specially designed LED backlighting MSI says gives "outstanding" energy saving performance, as well MSI's "Pro Kit" software suite.
