N. American solutions provider PCM makes its way to Europe with the opening of a UK-based subsidiary, PCM Technology Solutions UK (PCM UK)-- a move described as a "next major step" in PCM's global expansion.

Set to officially open on 2 May 2017, PCM UK should start operations on Q2 2017. It hopes to achieve "considerable scale" and employ around 90 co-workers by end 2017. Leading PCM UK is managing director Donavan Hutchinson, who joined PCM on February 2017 to help develop and create the PCM UK offering.

“Our expansion into the UK marks a major milestone for PCM as we introduce our world-class technology solutions and capabilities to new markets around the world. PCM UK will be our hub for the UK and the rest of Europe," PCM CEO Frank Khulusi says. "Many of our N. American customers are increasingly global with needs for us to deliver to their European operations cutting-edge IT solutions with the same high level of service they have grown accustomed to from us in N. America. We also believe that there are significant potential opportunities for customers based in the UK and across the European Union."

PCM UK is now looking for sales, vendor management, purchasing, marketing, IT and finance staff, as well as employees in a variety of other roles.
