

KanexPro Opens European Distribution Centre

Written by Alice Marshall
17 July 2019

Connectivity solution provider KanexPro makes a move into Europe by opening an international distribution centre in partnership with 3rd party logistics provider Black Box Logistics.

KanexPro brings a strong presence with European partners, including Atec Pro, Kinovox, Finnsat, FVS, Comil, ProdyTel, Exhibo, AVIT Vision, Media-Sys and AV Distribution. The partnership with Black Box Logistics allows KanexPro to bring products to market more quickly, increase stock availability for European customers, and deliver products in a shorter timeframe.

Based in the Netherlands, Black Box Logistics is a logistics provider serving brands, manufacturers, importers and retailers. It delivers to over 5500 retailers throughout Europe with sophisticated ICT and infrastructure.

“As KanexPro’s international manufacturer representative, we are pleased to announce a European distribution center to further emphasize KanexPro’s investment into the international market,” Global AV Network says. “KanexPro has built a strong international customer base since their inception and their European distribution center will allow us to expand our customer base, meanwhile, provide existing customers with efficient and reliable logistics services.”
