Edbak will bring to the videoconferencing market a 37-55 inch trolley with **motorised height adjustment** and **precision tilt** for display screens. The **ETR1** features electric telescopic height adjustment allowing easy height adjustment of the display by remote control (no tools needed).

You can also turn the base to tilt or angle the display-- a useful feature in rooms with tight spaces.

With easy 3-step installation, the ETR1 reflects Edbak's sturdy design and comes with easy-to-roll wheels so customers can roll the trolley to where it is needed. And the casters have brakes. Added cable management keeps all conference-room tidy.

Holds up to 80 kg and accommodates, with its universal design, a wide range of VESA mounts.

Comes in black or chrome with the column coated with mild steel powder for a stainless steel
