ClearOne announces the UNITE 50, a 4K ultra-wide angle video conferencing camera aimed for PC-based video conferencing and other collaboration experiences in huddle spaces and small conference rooms.

It offers USB plug-and-play capability, as well as a 120-degree field-of-view, digital zoom and easy integration with other equipment. Support for the USB Video Class (UVC) 1.1 standard allows maximum compatibility with a variety of cloud and room-based solutions, including Google Hangouts, as well as popular applications such as ClearOne COLLABORATE Space, Microsoft Teams, Skype for Business, Zoom, Webex and GoToMeeting, among others.

The camera features 4K30 resolution, X3 digital zoom and a full-function USB 3.0 interface for video and power. Wide dynamic range provides support for optimal capture. Customers can easily mount it on any display using either clip or standard rotary-shaft support.
