

ClearOne Intros COLLABORATE Versa Room CT

Written by Frederick Douglas
06 February 2020

ClearOne announces COLLABORATE Versa Room CT, a package providing all equipment and accessories required for cloud-based conferencing, including the USB audio-enabled Beamforming Mic Array Ceiling Tile (BMA CTH).

The BMA CTH performs acoustic echo cancellation, noise cancellation and beam selection, meaning no external DSP mixer is required. Adaptive steering (think of it as smart switching) provides "impeccable" room coverage. Also found built-in the BMA CTH are two 10W power amps driving the included 8-inch ceiling speakers.

Additional equipment and accessories create a complete room solution. For instance, the COLLABORATE Versa Hub provides a single-cable connection to the laptop or room PC for cloud-based collaboration, while the UNITE 50 4K camera brings a 120-degree wide-angle field of view. The package also includes a 15m CAT6 cable, 10m USB extender cable, PoE kit and 15m of speaker cable. A ClearOne Wall-Mount Bluetooth Expander allows the wireless connection of mobile devices.
