

ClearOne Intros Unite 20 Pro Webcam

Written by Frederick Douglas
24 April 2020

ClearOne brings "pro-quality" collaboration options to personal conferencing spaces with the launch of the Unite 20 Pro Webcam, a device customers can easily mount on a PC or laptop to provide a full 1080p30 image.

The webcam also provides an ultra wide-angle field-of-view (up to 120-degree), as well as a "super-high" signal-to-noise ratio and advanced 2D and 3D noise reduction to provide superior desktop camera video quality. It is compatible with most web conferencing applications, including Microsoft Teams, Zoom, WebEx and GoToMeeting, as well as ClearOne's own Collaborate Space.

For the ultimate personal collaboration workspace, ClearOne suggests pairing the Unite 20 Pro Webcam with a chat 50 or 150 speakerphone. For huddle spaces, the company has points out the Unite 50 4K ePTZ camera with 4K resolution and 120-degree ultra wide-angle field-of-view.
