

Polycom Expands Desktop Phone Portfolio

Written by Bob Snyder
09 December 2009

Polycom now offers a full portfolio of HD desktop phones... with the introduction of two new products - the Polycom SoundPoint IP 335 desktop phone and the Polycom CX300 desktop phone.

The SoundPoint IP 335 completes Polycom's portfolio of open SIP, standards-based desktop phones featuring Polycom HD Voice. The addition of the SoundPoint IP 335 makes HD Voice more widely available and more affordable than ever before. Businesses of any size can take advantage of Polycom's HD Voice technology without paying for a high-end desktop phone.

The CX300 is the newest addition to the CX product family optimized for Microsoft Office Communications Server 2007 R2.
