

8x8 Acquires Voicenet Solutions

Written by Marco Attard
14 November 2013

Cloud communications and collaborations solution vendor 8x8 coughs up \$18.4 million in cash for UK-based cloud telephony and unified communications services provider Voicenet Solutions.

Founded in 2004, Voicenet provides unified communications servivces, including fixed mobile convergence applications, for SMBs and mid-market businesses.

Voicenet customers clock at around 1000.

"This acquisition provides 8x8 an operational presence in Europe to support our US customers with multinational offices and at the same time enables Voicenet to market a broader range of services to its installed base of customers." 8x8 says. "We look forward to welcoming our new Voicenet employees to 8x8 and providing their UK customers with our comprehensive, secure and reliable cloud communications and collaboration services."
