

IP Phones from Grandstream

Written by Marco Attard
17 January 2014

Grandstream Networks launches a pair of desktop IP phones aimed at SMBs and enterprise customers-- the GXP2140 and GXP2160 Enterprise HD IP Phones, both with colour LCD displays, gigabit network ports and Bluetooth connectivity.

The two phones feature a new industrial design packed with enhanced software and hardware capabilities. Both support phonebook exchange/synch-up between GXP and mobile phones, call and phone operation via Bluetooth headsets, easy call transfer between GXP phones and iPhone or Android smartphones and even an automated local weather forecast.

All major SIP-based IP PBX/softswitch/IMS platforms are supported, including Broadsoft, Metaswitch, Asterisk and Elastix.

Hardware features include 4.3-inch 480x272 colour LCD, 5 programmable soft keys, HD audio on handset and speakerphone, 5-way conference, dual gigabit network ports with PoE, integrated Bluetooth and USB.

The GXP2140 supports 4 lines, up to 4 SIP accounts and up to 4 GXP2200 cascaded extension modules with LCD display. The GXP2160 supports 6 lines, 6 SIP accounts and has 24 programmable BLF extension keys.
