

CeBIT Launch for snom ONE Plus

Written by Marco Attard
24 February 2011

Alongside displaying its desktop IP phone and IP-PBX software ranges, snom will be launching its snom ONE Plus at this year's CeBIT.

ONE Plus is an all-in-one end-to-end telephone solution-- an easily and quickly implementable system providing remote working, centralised address book, simultaneous desk and mobile phone ringing together with a high security level.

Available in 2 versions-- blue (up to 150 extensions) and yellow (up to 20 extensions)-- the snom ONE Plus does not include mechanical parts, thus increasing durability and stability. Meanwhile a web-accessible interface provides complete system control and management.
