

Yamaha Debuts YAI-1 XL Bundle

Written by Alice Marshall
22 May 2019

Yamaha Unified Communications broadens its offering of bundled audio conferencing solutions with either the YAI-1 with up to x8 Executive Elite wireless microphones or the new YAI-1 XL with up to x16 microphones.

Both bundles include VXL 1-16 PoE speaker arrays, x2 preconfigured digital signal processors, a network switch, Dante AVIO USB adapter and cabling.

The YAI-1 XL ready-to-install professional audio system comprises two 8-channel Revolabs Executive Elite wireless microphone systems, four VXL 1-16 PoE speaker arrays, a preconfigured digital signal processor, a 10-port PoE switch, Dante AVIO USB adapter and cabling. The system is available with a choice of two microphone options. The boardroom bundle includes x14 gooseneck wireless microphones and x2 wearable microphones, while the conference bundle offers x14 directional tabletop wireless microphones and x2 wearable microphones for flexibility in conference rooms.

Once set up, the Ensemble is ready to connect to a UC platform of choice, such as Skype for Business, Cisco Webex, GoToConference, Zoom, BlueJeans, Amazon Chime and many others, via single USB cable. The system features adaptive AEC algorithms and dynamic microphone mixing technology to drive a best-in-class audio experience, and allows enterprise IT departments to enhance the AV offering with an easy-to-install system.
