---

The Sennheiser TeamConnect Ceiling 2 microphone gets certification for Microsoft Teams Rooms, the unified communications platform for team collaboration in Office 365, when deployed with Microsoft-certified DSPs.

“With TeamConnect Ceiling 2 we set web and video conferences free-- making them simpler and more productive, while ensuring optimum audio quality for remote participants,” Sennheiser says. “We are very happy to take this pursuit of simplicity, performance and reliability even further with a TeamConnect Ceiling 2 bundle that ensures a seamless experience for Microsoft Teams users.”

The ceiling array microphone offers easy installation and patented dynamic beamforming. The technology automatically focuses on the active speaker and follows their voice, no matter where they move in the room. Customers can combine multiple ceiling tiles to serve medium and large meeting rooms, allowing flexible use of the room with tables free from cables and microphones.

TeamConnect Ceiling 2 also offers installation flexibility, since it can be used with existing
