

iPhone Streaming

Written by Bob Snyder
14 April 2010

Don't even mention the iPad.

With millions of iPhone devices capable of receiving live streams, iStreamPlanet offers iPhone streaming delivered over the Akamai HD Network for part of your live event strategy.

iStreamPlanet partners with Akamai Technologies and the Akamai HD Network to offer an end-to-end solution that will allow you to add iPhone streaming to any live event between February 15, 2010 and May 31, 2010 at special pricing.

This promotion is valid for live events up to 3 hours in duration. 3rd party satellite acquisition can be added to either offer for an additional charge. The promotion includes all of the elements needed for a successful live event on the iPhone. Delivery charges will vary.
