

iPad Pro Smart Keyboard Goes International

Written by Marco Attard

Customers working in languages other than US English should be happy to learn Apple now offers the iPad Pro Smart Keyboard in a number of international layouts, all featuring the same dark gray design of the original.

The languages on offer are British English, French, German, Spanish, Italian, Arabic, Korean and Thai. The localised layouts come complete with differences related to the language in question, such as full support for right-to-left language in the case of the Arabic version. Such adjustments make sense, since iOS 9 already has comprehensive right-to-left language support.

The international keyboards are available in sizes fitting both 9.7- and 12.9-inch versions of the iPad Pro.
