

Marshall Intros New Room Sign Line

Written by Bob Snyder
14 January 2013

Marshall Electronics introduces two new room signs -- the **DP-1203K** with a built-in processor and the **DV-1202K** monitor.

Marshall's DP-1203K is a 12.1" digital sign featuring a built-in Atom processor with an Intel board in both surface and flush mount units.

The DV-1202K is a monitor featuring both HDMI and VGA inputs to run content from a variety of external sources. It can act as a stand-alone room sign via RS232 control. Comes in both surface and flush mount units.
