VIA Technologies showcased its VIA Vantage Digital Wall made of sixteen 46" super slim displays at DSE) 2013.

The VIA Vantage Digital Wall is a fully customizable solution with the use of either high-definition LCD displays or LED panels to better match the needs of any indoor or outdoor space and supports resolutions of up to 4K ultra-HD.]

Incorporating an unrestricted stitching feature, customers can freely combine panels in innovative new patterns to create mosaic-like displays which can run up to six independent 1080p videos simultaneously in the most popular formats including H.264, MPEG2, MPEG4, VC1, WMV9, WMV, AVI, MKV, ASF, FLV and DVR-MS.

A user-friendly drag and drop interface with big screen stitching capabilities lets customers arrange content across multiple screens for environments such as airports, bus and train stations, hotels, museums, offices, shopping centers, movie theaters and other public spaces.
