

ArtPlayer Joins Signagelive to Show Art

Written by Alice Marshall
25 April 2019

Signagelive announces a strategic partnership with ArtPlayer-- one allowing customers to select from "thousands" of modern and classical artworks to for playback on Signagelive-powered players and SoC Displays.

Integrated with Singagelive, ArtPlayer users can create and publish art directly into Signagelive without need to update manually. All subsequent content changes in ArtPlayer are automatically updated on Signagelive players showing the ArtPlayer content.

According to Signagelive, people work 15% faster in an office with art, and it can also reduce restlessness and perceived wait time in waiting rooms.

ArtPlayer is available in the Signagelive Marketplace and can be easily added to the Signagelive platform.
