

Microsoft Windows Embedded Partner of the Year

Written by Bob Snyder
24 November 2011

A drum roll, please...as we open the envelope with the nominations...and the winner of the **Microsoft Windows Embedded Partner of the Year** award goes to...

During the Windows Embedded Partner Executive Summit in Taipei, **AOpen won the award for Partner of the Year** for fastest growing company in the Digital Signage industry.

The **AOpen Digital Engine** is the company's flagship product and referred to as "the world's smallest semi-industrial media player with such strong capabilities". The compact size is a set standard and makes it easy to install, without increasing the space between the wall and the display, or to integrate in a kiosk or other specifically designed presentation system. Each Digital Engine unit has to pass vibration tests to guarantee its reliability.

AOpen has more than 15 years of IT hardware manufacturing experience that it believes will help drive the continuous development of high-end products specifically designed for the digital signage industry.
