

ErgoMounts Adds Floor-Standing Digital Signage Mount

Written by Frederick Douglas
13 April 2018

ErgoMounts expands the Infinity Video Wall series with a free standing floor base version-- the Infinity TV Floor Stand, able to support both VESA and non-VESA compliant screens.

Built out of light-weight aluminium components, the stand can be assembled in minutes and supports displays with interfaces up to 600 x 400mm and weighing up to 70kg. A heavy duty steel base eliminates the need to bolt to the floor, and included adjustable leveling feet support the stand on uneven surfaces.

Integrated cable management allows customers to hide all cabling.
