

Aten's First Video Wall Media Player

Written by Roger Douglas
18 May 2016

We told you it was coming—we reported the news from ISE 2016. And now **Aten** invites you to join them at a sports bar-themed stand at

Computex Taipei

(Asia's largest computer show) to see **their first video wall media player**

.

Aten will also show their PDU and KVM solutions (and a smart-room powered by the **ATEN Control System**

.)

The **VS1912 12-Port DP Video Wall Media Player** is a PC-based media player for multi-display applications such as digital signage, video walls, projection screens and digital board installations.

The VS1912 supports video wall configurations with up to 12 displays and allows you to design creative video walls in various asymmetric layouts. Custom widgets allow you to add banners, video playback, flash media, images and real-time clock displays over the screens. The Advanced Video Wall features allow you to resize, layer (including Picture in Picture), span across multiple screens and even rotate pictures and videos at 90° intervals.

Multimedia files are uploaded and the system is set up from a computer connected across a network. With a built-in web interface and intuitive GUI (Graphical User Interface), access and configuration is simple and does not require extra software. The VS1912 also features a

scheduling function that helps you create detailed playlists days, weeks or months ahead.

In addition, the VS1912 is equipped with two bi-directional RS-232 serial ports for high-end system control* (RS-232 functionality is pending and will be available with future firmware upgrades). There's an HDMI input port as well as USB 3.0 & USB 2.0 ports.
