With headquarters in Vancouver, Canada, **NorthVision** brings you their **VisionBoard Advanced Series**

interactive flat panel displays that feature various technologies and resolutions.

Students and teachers can touch and accurately control content with their **nSpace360 education software tool**

VisionBoard comes with an interactive flat panel display that enables dynamic writing, editing and instant sharing functions. Users can touch and control content accurately on the large 4K display.

Ultra HD4K, multi-touch capability, completed full-size selection, free and integrated interactive software, build-in dual system, connectivity, friendly UI, modern design, and eye care protection are in this product.

Three NorthVision software solutions (**nSpace360 /nShare360/Mirroring360**) seamlessly integrated into their VisionBoard.
