The Adobe MAX conference sees Dell launch an update of the 27-inch 4K UltraSharp monitor--the UltraSharp 27 4K PremierColor Monitor (UP2720Q), a version featuring an integrated colorimeter for more precise calibration options.

Like the previous model, the UP2720Q is primarily aimed at professionals working in the creative segment, such as photographers and designers. It offers a 10-bit IPS panel featuring 3840 x 2160 resolution, and is factory calibrated to Delta
