Canon XU-80 HD camera is network-based, remote controllable, and pan-tilt-zoom (PTZ) enabled.

The XU-80 HD PTZ camera can track fast movements while simultaneously panning and tilting at a maximum rate of 60 degrees/sec. The camera features a pan range of ± 180 degrees and a tilt range of +220 degrees/-40 degrees with a maximum noise level of NC30. It's well-suited for use in quiet environments where noise distractions are not permitted, including video, radio and performance studios, hospital operating theaters, conference rooms and lecture halls.

The housing of the XU-80 meets the IP-55 enclosure rating for waterproof and dust-proof applications. For use both outdoors or indoors, it features a CMOS HD 2.1 megapixel imaging sensor, 20x HD zoom lens (with additional 12x digital zoom) and also features genlock input and HD-SDI output.
