The Dinion HD 1080p Day/Night surveillance camera from Bosch Security Systems has been honored with [the red dot award](#) .

This is one of the world's largest and most renowned design competitions (this year attracted over 14,000 submissions from 58 countries – 4515 products alone in the category “Product Design”).

This winning design boasts a new casing to accommodate the sophisticated, HD-optimized technology inside.

Ad Biemans, Product Marketing Manager at Bosch Security Systems comments: “When monitoring colorful scenes with a large amount of activity, it is essential that you can see every last detail – in terms of both safety and security...”

The camera uses the latest CMOS-based HD sensor for a sharper, more detailed picture with a 16:9 image format. Multicasting, internet streaming and iSCSI recording (CCTV storage) are all fully supported, while the built-in Intelligent Video Analysis assists operators in monitoring a busy environment with such features as idle object, line crossing, flow detection, and crowd detection.
