

ViewSonic's Pro8300

Written by Bob Snyder
28 May 2012

ViewSonic launches its **Pro8300**, a 1080p Full HD 3000 lumen projector for business, education, and home entertainment applications.

Pro8300 projects information with 3000 lumens high brightness and a 1.5X optical zoom lens design to provide images with more 35% of additional zooming capability.

ViewSonic's Pro8300 offers enterprises increased flexibility and connectivity along with many sophisticated and user friendly features. A single PC input coupled with dual HDMI inputs and auto Keystone correction, the Pro8300 entertains audiences with a larger screen and also **allows multiple presenters to connect with it simultaneously**

PRO8300 will be shipped into Europe beginning of May 2012 retailing at £999.00 inc VAT (€1249.00 inc VAT).
