---

**Turn an existing display into a high performance touch screen.** NextWindow's latest large-format touch screen, 2700 Series, is a lightweight overlay that you can install via adjustable straps.

Designed for screens from 30" to 82", the 2700 is for public-facing applications such as digital signage, mall directories and classrooms.

Watch David Villarina, NextWindow marketing director, explain the company's presence at ISE during a RAVE EUROPE interview...
