

Refresh for Canon's LV Portable Projector Range

Written by Bob Snyder
02 July 2012

Canon Europe updates its LV portable projector range, adding 10 new models. The LV range is now divided into **Standard**, **Middle** and **Advanced** models, offering XGA and WXGA solutions to business, corporate and education environments.

Julian Rutland, Visual Communication Products and Solutions Director, Canon Europe, says: "The expansion of our LV range and the recent addition of two new models in our XEED installation range means that Canon now has a projector available for every business environment, from an entry level portable projector for a home office right through to a powerful installed projector in an exhibition hall..."

The **Advanced** models (LV-8227A WXGA 2500lm, LV-7392A XGA 3000lm, LV-7297A XGA 2600lm, LV-7292A XGA 2200lm) deliver vivid image quality and high contrast images even in bright environments. Four new models in the range offer from 2200 to 3000 lumens brightness, network connectivity and include built-in 10W speakers.

The **Middle** models (LV-8227M WXGA 2500lm, LV-7297M XGA 2600lm, LV-7292M XGA 2200lm) offer performance in small spaces and include 1W speakers and HDMI inputs.

The entry-level **Standard** models (LV-7392S XGA 3000lm, LV-7297S XGA 2600lm, LV-7292S XGA 2200lm) offer cost-effectiveness, with long-life lamps and filters and security features.

These models join the Advanced LV-7490 (XGA 4000lm), Advanced LV-8320 (WXGA 3000lm) and Ultra short throw LV-8235UST (WXGA 2500lm), to complete the range.
