Specialist distributor Nuvias announces the addition of a 4th region to its regional EMEA structure-- MEA, joining the other Nuvias regions of Northern, Central and Southern Europe.

The announcement comes as Nuvias acquires SCD, a Dubai-based distributor. The SCD offices will act as a hub for Nuvias MEA activities, covering all parts of the Golf Cooperation Council (GCC) area, Pakistan and Afghanistan. The Dubai office will also house a Nuvias Cyber Security Practice with vendors Unitrends, Malwarebytes, Black Duck and Netskope.

Other vendors signed with Nuvias in EMEA include JetNEXUS, Lifesize and Tintri.

“We have been working hard to bring the cyber security, advanced networking and unified comms capability of Wick Hill and Zycko to this region," the distributor says. "With the acquisition of the business in Dubai, operating across the region, and the recruitment of Muneeb Anjum, which will be followed by further additions to the team very soon, this is an exciting development for Nuvias and we look forward to bringing more capability and vendors to the region quickly.”
